WIRELESS GAMING & LOW LATENCY

The next-generation low-latency chip deliveries the fast gaming experience. The latency in the game audio mode is as low as 65ms, bringing you the new gaming experience.

MADE EASY

The ARIA POD+ is automatically powered up by simply picking an earpiece up. The left and right earphones are connected by TWS and can also connect automatically to your device if there was a previous connection.

DYNAMIC POWER

Advanced 13mm dynamic drivers pump out robust sound that offer crystal clear treble and deep bass that will bring your audio to life.

CHARGE IT UP

The ARIA POD+ adopts the mainstream

Type-C interface, which is thinner and smaller to achieve a greater power transmission.

PERFECT CONNECTION

The ARIA POD+ adopts the mainstream Type-C interface, which is thinner and smaller to achieve a greater power transmission.

ALWAYS CHARGED

Never worry about your ARIA POD+ running out of battery with the 300mAh Charging Box. Stress free music within reach.

SOLID & DURABLE

ARIA POD+ adopts a one-piece aluminum alloy housing which features an optimal structural strength, it is light weight and has an outstanding design giving you only the best.
